

ZER-O-PAC

SURGE/TRANSFER SYSTEMS

by *BFS Industries LLC*

Typical Vertical Surge/Transfer System

Typical Horizontal Surge/Transfer System with Tank Insulation

Typical Horizontal Surge/Transfer System in End to End Configuration with Deaerator

U.S. Government research facility installation

Foreground: 2000 gallon ZER-O-PAC surge/transfer system

Rear: mating 100,000#/HR ZER-O-PAC deaerating system

The perfect match: a ZER-O-PAC surge/transfer system and a ZER-O-PAC deaerating system. Both designed and manufactured by BFS Industries, a name associated with quality since 1946.

Our engineers relentlessly search for innovative ways to improve system capabilities in the areas of safety, reliability and efficiency. As the industry leader, we refuse to rest on our laurels and continue to forge on to new plateaus.

ZER-O-PAC surge/transfer systems are available in eighteen cataloged sizes ranging from 3,500#/HR to 150,000#/HR with an unlimited selection of non-standard sizes and options

A Quality Product is Only the Beginning at BFS Industries
